REGIONAL ANALYSIS OF SOCIO-ECONOMIC DEVELOPMENT IN
UTTAR PRADESH, INDIA

SHAFIQULLAH Siddiqui
Department of Geography, Aligarh Muslim University, India

ABSTRACT

Uttar Pradesh, the study area is currently in developing stage and has undertaken several policy measures to enhance the levels of development in social, economic, infrastructure, agriculture, human resources and the industrial sectors. The progress of socio-economic development among the districts is not uniform. The study examines the existing variability of inter-district development and thereby identifying the indicators responsible for the diversity in the development. It is concluded that north-eastern and south-eastern districts are relatively backward as compared to western and central districts.
